■ Necessity and Effect of Alkaline Water

The importance of water to the human body

- 💧 A person's body is made up of 70-80% water.
- 💧 When you drink water, it takes 30 seconds to be absorbed by the blood one minute for the brain, 10 minutes for skin tissue, and 20 minutes for liver, kidney, heart, etc.
- 💧 If you lose only 1 to 2% of your body's moisture, you will experience severe thirst. If you lose 5%, you will be semi-comatose. If you lose 10% or more, you will lapse into a coma and possibly die.
- 💧 Water in the body plays an integral role in physiological processes that maintain life, such as circulation, assimilation, excretion, and temperature control.

Permission from Korea Food & Drug Administration (KFDA)
- Helps to improve the four stomach symptoms

Characteristics of alkaline water

Characteristics of alkaline water

-  **It is rich in minerals. (Ionized minerals)**
 - Minerals are used to transport immune cells, discharge waste products, and supply nutrients in the body.
-  **The size of the water molecule cluster is small. (54hz)**
 - Alkali ionic water, with smaller particle size than normal water (120 Hz), absorbs quickly. It is easy on throat, so even those who have trouble drinking water can benefit from alkali ion water.
-  **Reductibility**
 - The water revitalizes the natural healing power of the body and restores immunity by flushing away acid waste that general water cannot remove.
-  **Rich in active hydrogen (hydrogen-rich water)**
 - Active hydrogen eliminates active oxygen in our body to prevent disease.
-  **pH alkalinity**
 - The human body is inherently mildly acidic. You can start your health care by drinking alkaline water of pH. similar to that of the human body.

Classification	Alkaline ionic water	Acidic ionic water	Tap water
Gathering ions	Cation (+)	Anion (-)	Cation + Anion
Ingredients of minerals	Calcium, magnesium, sodium ions	Chlorine, sulfuric acid, nitrate ion	-
pH	8.5 - 10	4 - 6	5.8 - 8.5
Oxidation-reduced potential (ORP)	-250 - -50	600 - 1,000	350 - 550
Size of water molecules (O-NMR)	55Hz - 65Hz	55Hz - 65Hz	120Hz

■ Effect

■ Alkaline Water Effect

Chronic diarrhea, indigestion, abnormal fermentation in the stomach, indigestion helps improve

■ Acidic Water Effect

Atopy improvement (relaxation) helps improve

Product Specification

Product Specification

	Detail Specification
Products	UNDERSINK FAUCET
Model Name	UD-3000
Product weight	App1.45Kg
Rated Voltage	AC 120V, 220V, 230V, 240V / 50Hz (Body voltage standard)
Water Generation	1) Alkali Water : 1~4stage 2) Acid Water : 2 stage 3) Purified Water
Power Protection Device	Fuse 3.15A
Function	<ul style="list-style-type: none"> ▶ Alkaline : 1~4 Level ▶ Acidic : 1~2 Level ▶ Purified ▶ DARC Display ▶ pH, ORP Display ▶ Clock function ▶ Voice(Korean, Chinese, English, German, Spanish, Russian) ▶ Start/Stop Key
